Community Health Needs Assessment Implementation Strategy 2019 -2021

1. Access to Care Tactics

Improve access to affordable healthcare

- **Implementation of care coordination and transitional care program**
- **Assistance with navigation and education of health insurance process**
- **Continued education for the uninsured/underinsured patients about the expanded MHS primary care locations and hours**

2. Preventative Care Tactics

Improve access to preventative care in SBHD

- Prenatal care for the prevention of low birthweight babies
- Continue to address low immunization rates for children & adults
- Education for the prevention of opioid misuse

3. Community Health Education Tactics

Promote wellness through patient education

- **Chronic disease self-management education offered at various times and locations to increase patient's opportunities to attend**
- **Health promotion and wellness group activities at all primary care centers**
- **Education for the prevention of sexually transmitted infections (STI)**

4. Quality of Care Tactics

Improve the quality of care for all patients

- **Consideration of diversity issues (gender, expression, LGBTQ)**
- **Develop an Integrated care system**
- **Impact of social determinants on population health**

5. Emergency Response Tactics

- *To serve as a leader in emergency response (including education of response personnel)*
- Design the All Hazard Regional Response Recovery System vehicle for implementation
- Educate emergency response personnel through the use of simulation
